

HBD/THERMOID®, INC.

Introduces new

AIR POWER™ JACKHAMMER HOSE FITTINGS

JACKHAMMER HOSE - NO MORE BANDS!

All HBD/Thermoid, Inc. Jackhammer Hose Assemblies will now be furnished with new, improved crimped fittings instead of the old one/two band styles. These new, crimped fittings and installation process offer you many advantages over the older one/two band fittings, including:

- Increased coupling retention
- Solid, secure seal at the fitting
- Improved flexibility at the fitting/hose connection
- Easier to handle....improved ergonomic design
- Eliminates snagging on gloves or clothes like banded assemblies
- Available on all grades of Jackhammer hose at no extra cost

NEW IMPROVED FITTING

OLD FITTING

Thermoid's Air Power™ is a jackhammer hose as rough and tough as its name. This solid built hose with four spiral construction is available in either 200, 250 or 300 psi working pressures. AIR POWER hose is designed to take on the roughest vibrations and conditions that only a jackhammer can dish out. The EPDM tube and cover can easily handle heat, ozone and the effects of weather better than other compounds. The new, improved crimped steel fittings will be installed on all jackhammer hose assemblies supplied. Thermoid's AIR POWER Hose with its improved fitting is ready for whatever hard work conditions are required.

COVER COLOR: Red or Yellow

BRANDING: Thermoid Air Power I.D. Inches (mm), W.P., Made in U.S.A.

OIL RESISTANCE: Limited

CONSTRUCTION: Tube: EPDM; Cover: EPDM;
Reinforcement: Spiral Polyester Yarn

TEMPERATURE RANGE: -40°F to +200°F • -40°C to +93°C

PACKAGING: 50 Ft. Lengths – 3/4" I.D., 28 per carton
1" I.D., 20 per carton
